

# SF Restaurants

**CS560 4/25/18 Clement, Han**

## Two data sources

- **Yelp**
- San Francisco **Health** Department  
Restaurant **Inspections**

Data Fusion!

# Why?

- CSV from SF Health Dept is boring and dry, and no information about restaurants besides name and address
- Yelp has inspection score, but can't filter and see scores on the map

## Questions we can answer

- What is the cheapest and cleanest and top rated Italian restaurant in SF?
- I get ~~the runs~~ food poisoning easily. Should I rather visit Chinatown or North Beach?
- Marina Middle School got a 96 this year, but did it get high scores consistently until now? Kenny needs healthy lunches!
- Is there a correlation between price, Yelp rating and health code violations?

Enough talking  
already.

See it in action.
